my goal is to create an awesome soundtrack for my video game using FL studio

oh wait no way!!

dude I've actually been working with FL Studio for a while now

I'm literally in the middle of writing this textbook about pop music composition

what kind of soundtrack are you thinking of making?

like what's the vibe you're going for?

I've lost my motivation to do anythin since I've been back home :p it's pretty bad

yea i am

had some family stuff

hmm... like which home though?

the one in [HIDDEN], are you here?

honestly think it's a draw lol

Books tell better stories because they allow for more complex storylines

I prefer books because they're phsyical and smell good teehee

honestly I love movies so much, I never have the attention span to finish a book tbh:p
